

Waterplex® Flexitank Solutions

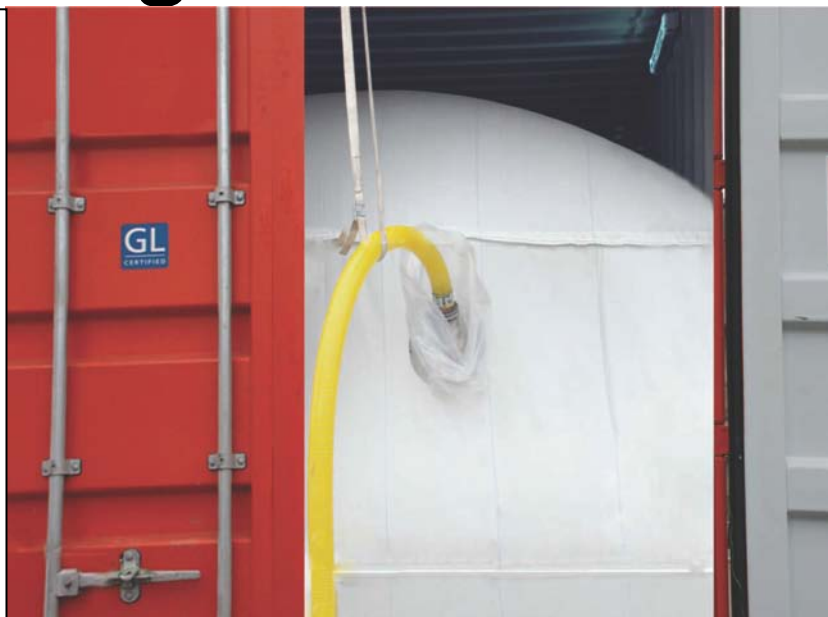

Waterplex® flexitank solutions turn shipping containers into liquid tankers.

- World first self-supporting flexitanks and conventional bulk head flexitanks
- Flexitanks to suit 20' and 40' shipping containers
- Flexitanks to suit refrigerated containers
- Flexitanks for flat bed trucks
- capacities ranging from 15,000 litres to 24,000 litres

Self-Supporting Flexitanks

- faster, simpler and cheaper installation
- self-supporting therefore no stress on shipping container
- lower waste and disposal costs
- two separate but connected fluid compartments designed to prevent liquid from moving
- range of valves available
- protective bonnets in case of leaking fittings

Conventional Flexitanks

- Flexitanks with reinforced bulk heads for transporting up to 24,000 litres
- range of fittings available
- installation guidance and training if required
- product only or door to door freight forwarding services
- made to ISO and FDA standards
- meet COA (Container Owner Association) requirements for flexitanks

Waterplex Expertise

- Waterplex® offers a complete door to door liquid transport solution if required
- Waterplex® can offer only the required product and / or services
- Waterplex is part of an international distribution network for liquid transport in flexitanks
- Waterplex® can customise flexitanks to meet specific liquid and customer needs
- Waterplex flexitank liquid transport solutions are ISO and use FDA approved materials
